## Microsoft® Office Access™ 2007: Level 1 (Second Edition)

### Course Specifications

Course number: 084887

Software: Microsoft® Office Access™ 2007

Course length: 1.0 day(s)

Certification: Microsoft Certified Application Specialist – Access™ 2007

**Course Description:** Most organizations maintain and manage large amounts of information. One of the most efficient and powerful ways of managing data is by using relational databases. Information can be stored, linked, and managed using a single relational database application and its associated tools. In this course, you will examine the basic database concepts, and create and modify databases and their various objects using the Microsoft® Office Access™ 2007 relational database application.

**Course Objective:** You will create and modify new databases and their various objects.

**Target Student:** This course is designed for students who wish to learn the basic operations of the Microsoft Access database application to perform their day-to-day responsibilities, and to understand the advantages that using a relational database application can bring to their business processes. The Level 1 course is for the individual whose job responsibilities include designing and creating new databases, tables, and relationships; creating and maintaining records; locating records; and producing reports based on the information in the database. Individuals who want to pursue Microsoft Certified Application Specialist certification in Microsoft Office Access 2007 can also take this course.

**Prerequisites:** Students should have completed the following courses or possess equivalent knowledge before starting this course:

- Windows 2000: Introduction
- Windows XP: Introduction
- Windows XP: Level 1
- Windows XP: Level 2

**Delivery Method:** Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

### Certification

This course is one of a series of Element K courseware titles that addresses Microsoft Certified Application Specialist (Microsoft Business Certification) skill sets. The Microsoft Certified Application Specialist program is for individuals who use Microsoft's business desktop software and who seek recognition for their expertise with specific Microsoft products. Certification candidates must pass one or more proficiency exams in order to earn Microsoft Certified Application Specialist certification.

### Performance-Based Objectives

Upon successful completion of this course, students will be able to:

- examine the basic database concepts and explore the Microsoft Office Access 2007 environment.
- design a simple database.
- build a new database with related tables.
- manage data in a table.
- query a database using different methods.
- design forms.
- generate reports.
