CCVP

CCVP Certification

The CCVP certification recognizes the increased importance placed on IT professionals of today who are responsible for integrating voice technology into underlying network architectures. Individuals who earn a CCVP certification can help create a telephony solution that is transparent, scalable, and manageable. Earning a CCVP certification validates a robust set of skills in implementing, operating, configuring, and troubleshooting a converged IP network. The certification content focuses on Cisco Unified Communications Manager (formerly Unified CallManager), quality of service (QoS), gateways, gatekeepers, IP phones, voice applications, and utilities on Cisco routers and Cisco Catalyst switches.

CCVP Prerequisites

CCNA Voice
OR
CCNA (until June 24, 2009)

CCVP Exams & Recommended Training

There are now two paths that can be taken to achieve CCVP certification

For individuals using Cisco Unified Communications Manager the following path towards certification is recommended:

Required Exam(s)	Recommended Training
642-436 CVOICE	Cisco Voice over IP (CVOICE v6.0)
642-446 CIPT1	Implementing Cisco Unified Communications Manager Part 1 (CIPT1 v6.0)
642-642 QoS	Quality of Service (QoS)
642-456 CIPT2	Implementing Cisco Unified Communications Manager Part 2 (CIPT2 v6.0)
642-426 TUC	Troubleshooting Cisco Unified Communications Systems (TUC v1.0)

CCVP Recertification

CCVP certifications are valid for three years. To recertify, pass any 642 exam that is part of the [professional level](#) curriculum after 01/01/06, or pass a current CCIE or CCDE written exam.
