Audience Profile

This workshop is intended for corporate or independent software vendor (ISV) application developers who have a desire to learn more about specific technology areas in Windows application development.

At Course Completion

After completing this course, students will be able to:

- Create a simple Windows Forms application.
- Configure standard controls.
- Build menus.
- Display and edit data by using data-bound controls.
- Provide user assistance and enhance usability.
- Create consistent applications by using dialogs and forms inheritance.
- Add print and report functionality to a Windows Forms application.
- Perform asynchronous tasks by using the BackgroundWorker component.
- Deploy a Windows Forms application by using ClickOnce.
- Build MDI applications.
- Customize Windows Forms and controls.
- Create customized print components.
- Perform drag-and-drop operations and implement Clipboard support.
- Perform asynchronous tasks in Windows Forms by using multithreaded techniques.
- Enhance the presentation of Windows Forms applications.
